

RON, NORTHLAND

"Thanks for steering me through the process and making it all happen painlessly."

Forest Type: Native

Ron's land features a small existing native forest, with the remainder now planted with manuka as a nursery crop infilled with various native trees such as Rewarewa, Puriri, Kahikatea, Kowhai, Kohuhu, Porokaiwhiri, Pate, Whauwhaupaku.

Solution: Emissions Trading Scheme

- 1 Ron reached out to us via our website through the free land assessment tool, notifying one of our Carbon Analysts.
- 2 CarbonCrop provided a Land Assessment with the help of our state-of-the-art technology.
- 3 CarbonCrop registered the nominated eligible forest into the ETS & are providing ongoing support.

"I decided to register the forest for carbon credits to enable a source of additional income. CarbonCrop were the first ones I contacted, and were very helpful.

My experience was good and I'd tell anyone considering working with you to go right ahead!"

- Ron
